IBS Promotion of the Month*

Papermakers know that optimum adjustment of drainage and vacuum levels at the wet end are critical to maintaining quality in their finished products. Let IBS put the best EVA system on the market on your machine.

Your benefits:

- + assures consistent dewatering conditions
- + highest accuracy in vacuum control
- + several different varieties available
- + innovative self cleaning valves
- + maintenance free operation
- + highest operational safety

Results:

- + no additional bleed valve necessary for liquid ring vacuum pumps
- + more headbox flow means better paper quality or higher output
- + no sheet sealing & more output
- + energy savings with respect to wet end drive load and power consumption of vacuum source
